

# LOKI'S LAVA LAMPS

## Equipment required

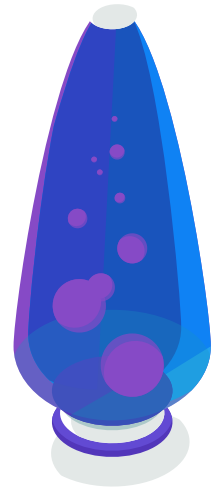

An empty water bottle

Vegetable Oil

Water

Food Colouring

Alka Seltzer Tablets

## INSTRUCTIONS

Fill the empty water bottle about 2/3 full with Vegetable oil.

Fill the rest, almost to the top with water.

Add several drops of food colouring and mix in with a skewer/ chopstick.

Now for the magic- when you are ready break an alka seltzer tablet into pieces and drop in one piece at a time. Screw back on the lid and watch the fun unfold.

**Don't forget to share your photos on the Braintree Scouts facebook page**

### TOP TIP

You can repeat this experiment over again by just adding more broken up alka seltzer. It should work as well days later too.
